

# Microsoft Fabric Deployment

## Engagement: 4 Week Proof of Concept

**Fabric** is Microsoft's new cloud data platform, providing customers a unified and user-friendly experience for data modelling and analytics. As the service nears general availability, SNP offers a 4-week proof of concept engagement to onboard customers.

SNP's engagement delivery is flexible to suit organizations with diverse reasons for adopting **Fabric**. It's for customers having a legacy Azure data platform, those migrating from a data warehouse solution on-premises and for those new to data warehousing and Power BI.

In our engagement, we provide a technical deep dive workshop on Microsoft Fabric, deploy a Proof of Concept (POC) of your analytics solution in Microsoft Fabric, and plan for subsequent pilot and production roll out phases.

### Solution Workloads

Your Proof of Concept will include two or more of following workloads:

- Data integration from sources
- Data Engineering
- Data Warehousing
- Business Intelligence and Reporting
- Real time analytics
- Data Science

### Fabric Features

Fabric offers a comprehensive suite of services for data management, analytics, and AI, all within a unified ecosystem. Key features include:

- Centralized Data Hub
- Customized Analytics
- AI Integration
- Governance and Compliance
- Flexible Cost Management

## About SNP Technologies Inc.

SNP's consulting services help businesses of all sizes transform with innovative, cloud-based solutions that harness the power of Microsoft Azure.

We combine elements from our [ISO certifications and Microsoft specializations](#) as well as the most efficient and innovative technology tools and platforms to help our clients become more agile, more customer focused and more operationally efficient.
